DETAILED ACTION

The restriction requirement mailed 07/11/2005 was inadvertently directed to a wrong set of claims. Consequently, the previous restriction requirement is vacated, and is replaced by the following restriction requirement. The period to respond is restarted.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3,5 drawn to a composition comprising conjugate of a therapeutic agent and a carrier, classified in class 436, subclass 519.
- II. Claim 4, drawn to method for selectively dissolving blood clots, classified in class 514, subclass 02.
- III. Claim 6, drawn to method for preventing blood clots, classified in class 514, subclass 02.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the methods can be practiced with a broad variety of drugs beyond the claimed conjugate, and the

Art Unit: 1631

product of Group I can be used in other methods, such as producing antibodies; and the methods II and III are alternate methods of using the compound of Group I.

Inventions II and III are related as patentably distinct methods which have different modes of operation, different functions, and also require different enablement considerations.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

If applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims which depend from or otherwise include all the limitations of the allowable product claim will be rejoined. (MPEP 821.04)

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
